

MARK-STAT

Liquid Anti-Static *Anti-Estatico En Liquido*

MARK-STAT eliminates electric shock caused by static electricity in carpet and upholstery fabrics. **MARK-STAT** dissipates the static electric charge which develops in cold climates, artificially heated rooms, and other low humidity areas.

MARK-STAT is most effective when applied to freshly cleaned carpets that have been thoroughly vacuumed. Shampoo residue will decrease the effectiveness of this antistatic product.

MARK-STAT, when applied properly, will have a useful life of 12 to 16 weeks depending upon humidity and atmospheric conditions.

MARK-STAT is used full strength. Apply with a sprayer, pump up type or trigger, depending on size of area to be treated.

RECOMMENDED USES:

- Where static electricity is a major concern
- Provide a release path for static electricity

BENEFITS:

- Insure Computer Room Safety
- Use in Operating Rooms
- Eliminates electric shock on carpet and upholstery fabrics.

DIRECTIONS FOR USE:

MARK-STAT may be applied to a freshly shampooed carpet after its final vacuuming but while still damp. Spray a fine light mist over entire area, cover surface evenly and completely, but do not saturate. Allow carpet to dry thoroughly before opening area to traffic.

Keep sprayer close to floor to avoid contaminating the air. Do not breathe spray mist or get in eyes.

Adjust sprayer to deliver fine even mist. A second pass in a 90 degree cross direction helps in uniformity of treatment.

BEFORE USING ANY SPOTTER OR SHAMPOO, test a small inconspicuous area for dye stability.
