

MARK TAN

Tannin Stain Remover *Removedor De Manchas Taninas*

MARK-TAN neutralizes tannin types stains normally not removed by alkaline cleaners or solvent cleaning solutions. These stains are brown or yellow residues from coffee, tea, wine, soft drinks, urine, vomit, etc.

MARK-TAN effectively removes "browning" caused by water spills or over saturation with shampoo solutions. It "bleaches" out stains caused by wicking.

RECOMMENDED USES:

- Urine Stains
- Coffee and Tea Stains
- Wine, Fruit, and Berry Stains
- Soft Drink Stains
- Other Brown and Yellow Stains

BENEFITS:

- Neutralizes Tannin Types Stains Normally not Removed by Alkaline Cleaners or Solvent Cleaning Solutions.

DIRECTIONS FOR USE:

Before using any spotter test it on the carpet to be cleaned. Apply a few drops in an inconspicuous area. If color or fiber texture changes, DO NOT proceed. Call your supplier. After testing Tanning Stain Remover, always apply a few drops of shampoo to area, work into fibers and blot.

CARPET SPOTTING:

MARK-TAN should be used full strength to remove tannin stains. Apply a few drops to stain and allow it to penetrate. If needed, work the solution into the stain with carpet scraper. Flush with a few drops of water and blot with a white, absorbent toweling. Repeat procedure if necessary.

After spot is removed, neutralize with **Mark-Pro**, then flush with **Mark L¹** shampoo, following label directions.

Tannin Stain Remover is also used to eliminate water spots and browning caused by overwetting and/or shampoo residue. Mix 8 ounces Tannin Stain Remover to each gallon of water and apply with a pump-up type sprayer or carpet shampoo machine.

IMPORTANT: This product will remove the brown or yellow discoloration immediately and must then be flushed off the carpet using hot water extraction or normal shampooing.
