

PEPCO 415

Powdered Hand Cleaner Contains *LANOLIN* and *LECITHIN*

A unique combination of quality ingredients to gently clean hands without stripping natural skin oils. Contains vegetable soaps, natural lanolin and mild scrubbers.

Removes tough soils, even ink. Excellent for both plant and office workers.

PEPCO 415 contains lanolin and lecithin. Prolonged use of many skin cleaners will deplete natural oils. These two skin emollients replenish oils lost in the washing process and thus prevent chapping and drying.

Light and fluffy in appearance, **PEPCO 415** is 20% to 35% lighter per unit volume than most powdered hand soaps. Since these products are generally dispensed by volume, not weight, **PEPCO 415** is more economical to use.

RECOMMENDED USES:

- Plant – Industrial
- Schools
- Commercial
- Offices
- Restaurants – Food Service

BENEFITS:

- Contains No Fillers
- Easy on Hands
- Will Not Clog Plumbing
- Use Hot or Cold Water
- Free Flowing
- High Sudsing
- Free Rinsing
- 100% Active

SPECIAL INSTRUCTIONS:

KEEP THIS AND ALL CHEMICALS
OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE:

1. Wet Hands
2. Add Pepco 415
3. Work Up Lather
4. Add More Water
5. Wash Arms and Fingernails
6. Rinse and Dry

Easy On Hands: Contains lanolin plus lecithin skin emollients – Will Not Chap or Dry Skin.

Cleans Better: Selected scrubbers insure faster washes – No Harsh Abrasives.

High Sudsing: Rich lather works hard to dig out grime.
