

SUPER 703

Heavy Duty Industrial Cleaner Degreaser *Limpiador y Desgrasador Industrial De Uso Ponderoso*

This product's strength separates it from all other liquid cleaner/degreasers. It dissolves industrial soils, grease, and oil better than ordinary products. It works where you never thought you would find a cleaner that would.

This product removes all common soils such as grease, oil, tar, gum, carbon deposits, ink, dye, soap scum, and many others. Used as directed it may be used on many surfaces such as metal, plastic, rubber, porcelain, concrete, tile, terrazzo.

This product may be used in automatic scrubbers, pressure washers, steam cleaners or simply in a bucket with a mop, rag or sponge. Diluted with water, this liquid works well as a spray and wipe cleaner. This product may also be employed as a hot or cold tank degreaser.

RECOMMENDED USES:

- Automatic Floor Scrubbers
- Transportation Terminals/Garages
- Concrete Floors
- Steam Cleaning/Pressure Washing
- Kitchen Floors/Food Processing Areas
- Engine Degreasing
- Ovens/Broilers and Cooking Equipment
- Cold or Hot Tank Cleaning
- Removes Rubber Marks

BENEFITS:

- Biodegradable
- Extra Power for the Toughest Soils
- Dissolves Grease and Oil
- Water Based Formulation
- Low Foaming
- No Hazardous Waste Disposal
- Removes Burnt on Carbonized Soils

SPECIAL INSTRUCTIONS:

- Do not use on glass surfaces – may etch. Rinse off immediately.
- May be corrosive to some soft metals

DIRECTIONS FOR USE:

CONCRETE FLOORS:

Dilute 1:20 (6 oz.) up to 1:60 (2 oz.) per gallon of water. For heavy grease dilute 1:10 (12 oz. per gallon).

PRESSURE WASH/STEAM CLEANING:

Dilute 1:20 (6 oz.) - 1:100 (1 oz.) per gallon.

SPRAY 'N WIPE:

Dilute 1 ounce per 32 ounces of water.

HOT/COLD TANK DEGREASING:

Dilute 1:10 (12 oz.) up to 1:20 (6 oz.) per gallon of water.

ENGINE DEGREASING:

Dilute 1:10 (12 oz. per gallon)

Use one part cleaner to five parts water on stoves, fryers, greasy concrete floors, ventilating and air filtering systems, carbonized grease on baked pans, and all generally greasy surfaces or exceptionally stubborn soils in and around the kitchen. Increase or decrease concentrations as necessary.

Use one part to eight parts hot water for removing rubber burns and heavy wax build-up on floors of all kinds.

For use in meat and poultry processing plants, directions must be followed by potable water rinse.

CAUTION: Do not allow to dry on glass — may etch.
