Foaming Acid Cleaner and Delimer

Limpiador De Acido Espumoso y Quitador De Cal

This remarkable acid cleaner saves time and labor. High foam clings to vertical walls, surfaces and fixtures. Now you can foam instead of scrub. The clinging foam generated by this product penetrates and lifts soils and lime and allows them to be rinsed away easily.

Safely removes calcium, magnesium and other tough water deposits without harsh irritating acid vapors. Buffered formulation is safe on porcelain, chrome, plastic and grouted surfaces.

This detergent contains a blend of mild organic and inorganic acids, synthetic wetting agents and a special additive to cut grease and soap scum. Surfaces are left clean, shiny and film free.

This acid is ideal for cleaning restrooms, including ceramic tile, basins, sinks, toilets; shower stalls, again including ceramic tile and grout; chrome fixtures; air conditioning coils; water coolers; stainless steel kitchen surfaces; magnesium and aluminum wheels and many others.

RECOMMENDED USES:

- High Pressure Foam Systems
- Bathroom Cleaning
- Shower Rooms—Athletic Facilities
- General Cleaning
- Air Conditioning Coils
- Ceramic Tiles
- Faucet Spouts and Water Fountains
- Kitchen Steamers

BENEFITS:

- Clings to Vertical Surfaces
- SAFE on most metal surfaces
- CLEANS Without Abrasives
- NO OFFENSIVE FUMES
- DISSOLVES Hard Water Minerals
- Attacks Soap Scum—Rinses Freely
- HIGH FOAMING All Purpose ACID Cleaner

SPECIAL INSTRUCTIONS:

DIRECTIONS: Follow all product label directions and wear appropriate eye and skin protective clothing.

**KEEP THIS AND ALL CHEMICALS
OUT OF REACH OF CHILDREN**

DIRECTIONS FOR USE:

WATER PRESSURE FOAMERS: Add straight to detergent reservoir or jug. Adjust metering tip or change tip to yield a dilution of between 1 to 20 or 1 to 30. Foam surfaces thoroughly using hot water and allow to stand for a few minutes. Brush areas where foam does not darken due to lifted soil. Rinse clean with water.

AIR PRESSURE FOAMERS: Dilute 1 to 30 in detergent tank with hot water. Foam surface thoroughly and allow to stand for a few minutes. Brush area where foam does not darken due to lifted soil. Rinse clean with water.

TRIGGER FOAMERS: Dilute 1 to 10 with warm water. Foam surface thoroughly and rinse clean with water.

GENERAL CLEANING: Add 2 to 4 oz. per gallon of hot water. Mop, spray or wipe on and scrub as necessary. Rinse with water.
