CARPET AND UPHOLSTERY PROTECTANT

Dual Action Adds "Stain Resistance" to Nylon Carpet

Safeguard Carpet And Upholstery Protectant. Most carpet protectors sold today are effective on either water or oil based soils, but not both. The revolutionary technology of Safeguard Carpet and Upholstery Protectant has EXCELLENT oil and water and alcohol repellency. As a result, carpet and upholstery that have been treated with this product will have exceptional soil resistance and great soil and stain release performance.

Safeguard Carpet and Upholstery Protectant will impart soil and stain resistance that is as good as or better than the original mill applied protector. It also meets all V.O.C. regulations.

Complies with carpet manufacturer's guidelines for "Wet Side" cleaning.

DIRECTIONS:

- 1) Apply SafeGuard Carpet and Upholstery Protectant only to new carpets or recently cleaned carpets. If it is desired to treat a carpet immediately after cleaning, it is not necessary to dry the carpet before application.
- 2) Do Not Dilute. Apply with a pump up type sprayer for small areas. Adjust sprayer to deliver an extremely fine mist and spray evenly over the carpet.
- 3) Apply. Make two passes to assure even coverage; first from side

to side, then back to front. Apply at the rate of 400 to 600 square feet per gallon, depending on carpet pile density.

- 4) After application, allow carpet to air dry before walking on it or replacing furniture.

**As with all cleaning products, always check for colorfastness on carpeting and upholstery in an inconspicuous area before using these products.*
