Low Temperature Detergent *Detergente Para Baja Temperatura*

You wanted economical dishwashing, so you chose the low temperature method. Now you need an economical detergent. **LTD** is it! This detergent is specially designed for low temperature machines and is a super strength, ready-to-use product. Liquids are instant action, dispersion is immediate, and the correct concentration is quickly attained.

LTD's performance is excellent. It cuts and emulsifies grease for unexpected cleaning in low-temp machines. Glasses, dishes, and silver sparkle, and **LTD** will not harm delicate machine parts.

This thin, liquid is easy-to-use and you get full use of every drop. Liquids are pumped into the machine, nothing to clog the dispenser, and no product gets left in the container, out of reach of the feeding system.

For complete satisfaction with your low temperature machine and product performance, get **LTD**.

RECOMMENDED USES:

- Low temperature machines
- Automatic glass washer

BENEFITS:

- EXCELLENT detergency
- ECONOMICAL use dilutions
- NON-FOAMING formula
- NON-CLOGGING liquid

SPECIAL INSTRUCTIONS:

Use detergent control to maintain proper concentration.

DIRECTIONS FOR USE:

LOW TEMPERATURE DISHWASHERS: Adjust dispenser (pump) to deliver 3 to 7 cc per 1 1/2 to 2 gallons of water in the wash cycle. For softer or hotter water with less soil load, add less detergent. For harder or cooler water or with heavier soil loads, add more detergent.

CONVERTED HOT MACHINES: Adjust electronic control to deliver enough detergent to achieve desired results.

**FOR INDUSTRIAL AND
INSTITUTIONAL USE ONLY**
