

# PLASTISOAK

## For Cleaning and Destaining Plasticware *Para Limpiar Y Desmanchar Utensilos de Plastico*

Plasticware is designed to be economical...but stubborn stains can reduce its useful life.

With regular use, this oxygen-releasing granular detergent will keep plasticware clean and new-looking. This special formula destains plastic without stripping the glaze that is the natural barrier which controls staining, and taste and odor absorption.

Just a quick 5 minutes pre-soak, then process plasticware through the dish machine for clean, fresh smelling storage and serving containers.

To destain plasticware in the dish machine, simply add **PLASTISOAK** to the detergent. It can save pre-soaking time and speed up the entire dishwashing operation.

**PLASTISOAK** is an effective aluminum and stainless coffee urns cleaner and destainer. It removes rancid oils and tannins and doesn't leave an aftertaste.

### **RECOMMENDED USES:**

- Plasticware Pre-soak
- Dish Machine Detergent Additive
- Destain Aluminum and Stainless Tea/Coffee Urns

### **BENEFITS:**

- SAFE—Will not deglaze plastics
- DESTAINS
- KEEPS PLASTICWARE SERVICEABLE LONGER
- DEODORIZES

### **SPECIAL INSTRUCTIONS:**

- Always wash and rinse coffee and tea urns thoroughly after destaining

### **DIRECTIONS FOR USE:**

**PLASTIC DESTAINING:** Fill soak pan with warm water. Add compound at the rate of 1 to 2 ounces per gallon. Allow plasticware to soak for 5 minutes.

**COFFEE URNS:** Dilute compound 1 ounce per gallon of warm water. Pour solution into urn and let soak 5 to 10 minutes. Remove and rinse with clean water.
