

# SOLID SILVER SHINE

## Heavy Duty Concentrated Flatware Presoak with Enzymes *Pre-Remojador Concentrado Para Utensilios Con Enzimas*

A super effective presoak in the dishpantry where flatware rejects are a major problem. An exceptional blend of surfactants and enzymes that quickly penetrate, emulsify, and lift dried egg yolk, cheese, and other difficult-to-remove proteins from flatware. Use it to presoak gravy boats, French onion soup crocks, reusable seafood shells, and other hard-to-clean items.

**SOLID SILVER SHINE** also detarnishes silver and silver plate quickly without rubbing. Cleans even ornate debossed or embossed patterns thoroughly. **SOLID SILVER SHINE** “destains”—it does NOT remove the surface layer of metal.

The unique package and delivery system controls costs. Solids are easy to handle. The container is part of the dispensing system; simply drop the jar into the feeder cone, activate and stop dishpantry rejects economically, with no measuring, no mess and no waste.

### **RECOMMENDED USES:**

- Detarnish silver flatware and hollowware
- Soak stainless flatware and serving pieces before dishmachine processing

### **BENEFITS:**

- CONVENIENT—blue color indicates product is in the presoak solution
- SAFE—non-corrosive, non-abrasive
- CONTROLLED DISPENSING—prevents overuse
- EFFECTIVE—gives tableware a “just polished” look
- ECONOMICAL—no waste

### **SPECIAL INSTRUCTIONS:**

- Silver and Stainless items must be completely immersed in solution.

### **DIRECTIONS FOR USE:**

1. Use only in APPROVED DISPENSERS.
2. DO NOT mix with anything other than water.
3. Unscrew and remove cap from the capsule
4. Turn capsule over and insert into the dispenser.

DO NOT REMOVE CAPSULE  
UNTIL IT IS EMPTY.

Consult your local sales representative for proper use concentrations.

**FOR INDUSTRIAL AND  
INSTITUTIONAL USE ONLY**
